1. ■ Hidden Gems — Organization Information

About Hidden Gems

Hidden Gems (full legal name: Hidden Gems Society) is a Student & Faculty Growth Community based in Telangana, India. The organization describes itself with the tagline "Unearthing Potential" and the guiding line "Every breakthrough starts unpolished." Hidden Gems finds raw potential in students and educators and puts real pressure behind it — through hackathons, mentorship, and faculty programs that turn ideas into industry-ready output. The organization is an MSME-registered entity.

Mission / What Hidden Gems Does

While the website does not publish a single formal "Mission Statement" or "Vision Statement" in those exact labelled sections, its stated purpose (drawn from the homepage hero and "What we actually deliver" sections) functions as its mission and vision:

- **Core purpose:** To find raw, unpolished potential in students and educators and apply real-world pressure and support (hackathons, mentorship, faculty programs) to convert that potential into industry-ready output.
- **What it does:** Runs student development programs, job-readiness training, hackathons/ideathons, corporate trainings, and child development programs; connects students directly with practicing entrepreneurs; and runs Faculty Development Programs (FDPs) for educators at partner colleges.

Not published on the website at the time of this extraction. (No separately labelled "Objectives" list is published; objectives are inferred from the five program types and the "What we actually deliver" section below.)

What Hidden Gems Actually Delivers (stated differentiators)

- **1:1 Mentor Ratio** — No cohort-average pacing; every student gets a dedicated mentor who adjusts to where they actually are.
- **Real Entrepreneurs, Not Just Theory** — Every program puts participants in a room with people actually running businesses, not case studies about them.
- **Verified Certificates** — MSME-registered, documented, and addressed to the recipient by name, not a generic participation PDF.
- **Transparent, Always** — Full photo and video documentation on every program, plus a public breakdown of where funds go.
- **Reasoning Over Memorization** — Teaches why a decision works, not just what to type or say, so it transfers to the next problem.
- **A Track Record You Can Check** — From Osmania Ground to Vignan Institute of Technology, every milestone is documented, not claimed.

Who Founded It / Team & Leadership

The website does not publish individual founder names, photos, or a leadership/team page (no "About Us" or "Team" page was found among the site's linked pages). It refers generally to a "founding team" and a "core team," and invites direct WhatsApp contact with "our founding team for quick questions."

Not published on the website at the time of this extraction.

Organization History (Milestones / "The Journey")

The homepage documents its history as four milestones under "The Journey · Formation to Facet":

Milestone 01 — Bedrock: Officially Registered, First Ideas on Paper

Hidden Gems Society became an MSME-registered entity, then held its first major gathering at Osmania Ground — a room full of would-be founders sketching business ideas and mapping the real-time problems entrepreneurs actually face. The full day is documented on video and in photos.

Milestone 02 — Sediment: Karimnagar Meets Hyderabad

The second major meetup moved to Ujwala Park in Karimnagar, bringing new students from Karimnagar and Hyderabad into the same room for the first time. The day centered on team-building activities designed to instill a shared business mindset across every team — not just individual skill-building.

Milestone 03 — Quartz Vein: Cohort-1 Launches, Ignite-X Ignites

Hidden Gems ran its first structured program, Cohort-1 (Online Internship) — a 30-student online internship where participants learned to analyze real local businesses, weigh the trade-offs behind an actual business decision, and sit down directly with practicing entrepreneurs to understand strategy from the inside. Cohort-1 closed with Ignite-X, an online hackathon that awarded real prize money and certificates to its winners (elsewhere described as "48 hours of intense coding, problem-solving, and pitching directly to business leaders").

Milestone 04 — Cut & Polished: A Flagship FDP at Vignan Institute of Technology

Hidden Gems ran its most ambitious program yet at Vignan Institute of Technology — described as the 2nd top college in Telangana — training faculty across 2 offline classes and 4 online classes on emerging AI technologies, soft skills, and electronics integrated with AI tooling. Feedback was overwhelmingly positive, and every session is documented in photos and video.

Locations / Presence

Currently operating and hosting events across **Telangana, India**. Documented event locations include Osmania Ground, Ujwala Park (Karimnagar), and Vignan Institute of Technology. The site footer lists the location simply as "Telangana, IN."

Contact Information

Email	hiddengemssocietyngo@gmail.com
WhatsApp / Call	+91 94946 08408 (wa.me/919494608408)
Location	Telangana, India (region-wide; no single street address published)

Official Website and Social Links

Website	https://www.hiddengemsco.in/
---------	---

Not published on the website at the time of this extraction. No specific social media handle URLs (Instagram/LinkedIn/etc.) were found linked in the page content — only a generic "Share this page" action was present in the footer.

2. ■ Community Information

Who Can Join / Target Audience

The community is explicitly positioned "For Students & Educators," with pathways also described for job-seekers, faculty/institutions, and businesses. The site's own "60-Second Match" quiz frames the audience segments as:

- ■ Students
- ■ Job hunters
- ■■■ Faculty / institutions
- ■ Businesses

Student Categories (from registration/application forms)

- High School Student
- College Student
- Recent Graduate
- Faculty / Educator
- Working Professional
- Other

Program-registration forms also capture Year of Study: 1st Year, 2nd Year, 3rd Year, 4th Year, Recently Graduated, or Working Professional.

Community Benefits (Free Membership Tier)

- Invites to meetups & founder talks
- Monthly newsletter & opportunity alerts
- Early access to hackathon registrations

Community Structure

The community is organized around a layered structure rather than fixed "chapters":

- **Open Community** — free, open membership (newsletter, meetup invites, early hackathon access).
- **Structured Programs** — paid, cohort-based programs (e.g., the ■999 Cohort/Online Internship).
- **Institutional Partnerships** — Faculty Development Programs and corporate trainings run directly with colleges/companies on a custom-quote basis.
- **Core Team** — volunteer/intern contributors in roles such as Social Media Manager, Video Editor / Animator, Graphic Designer, Content Writer / Copywriter, Web Developer, Event Coordinator, Community Manager, and UI/UX Designer.

How to Become a Member

Submit the "Join the Community" form with Full Name, Email Address, and Mobile Number. The site states: "The admin dashboard will receive your request immediately." (Form page: [join_community.html](#))

Membership Requirements

No formal eligibility criteria (age, academic level, location) are published for the free community tier — it appears open to any student, educator, or interested individual who submits the join form.

Membership Process

- Fill the Join Community form (Name, Email, Mobile Number).
- Submit — the request routes directly to Hidden Gems' admin dashboard.
- No separate approval/confirmation step is described on the page itself.

Membership Fees

Community Membership is Free. Paid tiers exist only at the program level (see Section 12 — Fees & Payments).

Community Guidelines

Not published on the website at the time of this extraction. No separate code-of-conduct or community-guidelines document/page was found linked from the site.

3. ■ Programs

Hidden Gems Community runs five program types, presented on the homepage under "Programmes by Hidden Gems Community — Five programs. One growth path." Full itemised details for each are below. None of the five program pages publish an exact duration in weeks/months, a fixed calendar schedule, or a numeric eligibility cut-off (e.g., a CGPA) beyond what is captured in the registration form fields — these gaps are marked explicitly.

■ Program 1 — Student Development Program (SDP)

Description	Soft skills, tech skills, STEM & STEAM foundations, and hands-on exposure to advanced technologies — built to take a student from curious to capable.
Purpose	Build a student's foundational soft skills, core tech skills, and STEM/STEAM base before introducing advanced technology.
Target Audience	Students (school through college level); the site's own "60-Second Match" quiz recommends SDP as the default first step for students newly exploring the community.
Eligibility	No prior experience required — the FAQ explicitly states SDP "is built for beginners."
Required Skills	None; taught from the ground up.
Level	Beginner-friendly (explicitly stated in FAQ).
Duration / Schedule	Not published on the website at the time of this extraction.
Mode	Not published on the website at the time of this extraction. (not explicitly stated as online/offline for this specific program; flagship programs are generally in-person while cohorts run online — see Section 16).
Location	Telangana, India (community/partner venues) — exact venue not published per-intake.
Fees	Not published on the website at the time of this extraction. (not listed individually; general program fee guidance is in Section 12).
Certificate	Verified, MSME-registered certificate, addressed to the recipient by name (per site-wide certificate policy).
Application Process	Register via the "Join This Program" form (join_program.html), selecting "Student Development Program (SDP)" as the program.
Registration Link	https://www.hiddengemsco.in/join_program.html
Application Deadline	Not published on the website at the time of this extraction.
Current Status	Active / ongoing (listed as one of five standing programs).

What it covers:

- Soft skills & communication training
- Core tech skills across popular stacks
- STEM & STEAM hands-on projects
- Intro to advanced tech: AI, IoT, robotics

Call to action: Join This Program → — https://www.hiddengemsco.in/join_program.html

■ Program 2 — Job Readiness Program

Description	The bridge from classroom skills to a real job offer — resume, interview, and workplace readiness built around actual hiring expectations.
Purpose	Prepare students/graduates for the hiring process end-to-end.

Target Audience	College students nearing graduation, recent graduates, and job seekers.
Eligibility	Not published on the website at the time of this extraction. (no explicit prerequisite stated beyond general applicant background captured in the registration form).
Required Skills	None specified as mandatory; program is designed to build job-readiness skills.
Level	Not published on the website at the time of this extraction.
Duration / Schedule	Not published on the website at the time of this extraction.
Mode	Not published on the website at the time of this extraction.
Location	Telangana, India (community/partner venues).
Fees	Not published on the website at the time of this extraction.
Certificate	Verified, MSME-registered certificate (site-wide policy).
Application Process	Register via the "Join This Program" form, selecting "Job Readiness Program."
Registration Link	https://www.hiddengemsco.in/join_program.html
Application Deadline	Not published on the website at the time of this extraction.
Current Status	Active / ongoing.

What it covers:

- Resume & LinkedIn profile building
- Mock interviews with real professionals
- Aptitude & communication prep
- Direct exposure to hiring partners

Call to action: Join This Program → — https://www.hiddengemsco.in/join_program.html

■ Program 3 — Hackathon / Ideathon

Description	Time-boxed, high-pressure building — where SDP and Job Readiness skills get tested against a real problem statement and a room of judges.
Purpose	Apply learned skills under real deadline pressure against real business problem statements, with direct pitch access to business leaders.
Target Audience	Students/teams who have engaged with SDP/Job Readiness or want to compete directly.
Eligibility	Register as a team (see registration form; individual vs. team format not separately specified site-wide).
Required Skills	Varies by problem statement; general building/coding/pitching skills implied.
Level	Not published on the website at the time of this extraction.
Duration	Flagship example (Ignite-X) ran approximately 48 hours.
Mode	Both online (e.g., Ignite-X ran as an online hackathon) and offline/on-campus formats have been run historically.
Location	Telangana, India / online.
Fees	Not published on the website at the time of this extraction. (not listed as a separate hackathon fee; entry has also been bundled free with the ■999 Cohort program as "guaranteed entry into the closing hackathon").
Prizes	Real prize money and certificates awarded to winners (per Ignite-X milestone).

Certificate	Certificates for winners (documented); general participation certificate policy also applies site-wide.
Application Process	Register via the "Join This Program" form, selecting "Hackathon / Ideathon."
Registration Link	https://www.hiddengemsco.in/join_program.html
Application Deadline	Not published on the website at the time of this extraction.
Current Status	Next edition ("the next Ignite-X") is described as "in planning" — see Section 16.

What it covers:

- Real problem statements from businesses
- Team-based building under a deadline
- Prize money & certificates for winners
- Direct pitch time with business leaders

Call to action: Join This Program → — https://www.hiddengemsco.in/join_program.html

■ Program 4 — Corporate Trainings / Faculty Development Program (FDP)

Description	Custom upskilling workshops brought directly into a company or institution — tech, soft skills, and modern tools taught by people who actually use them.
Purpose	Upskill employees (corporate training) or faculty (FDP) with tailored, hands-on curricula rather than lecture-only formats.
Target Audience	Companies (corporate training) and educational institutions / faculty (FDP).
Eligibility	Institution/company must request and agree a custom scope via quote.
Format (flagship FDP example)	3-day, on-campus, tailored curriculum; AI, soft skills, and AI-integrated electronics tracks. The Vignan Institute of Technology flagship FDP specifically ran 2 offline classes and 4 online classes.
Mode	Hybrid — on-campus (offline) plus online class components, per the flagship example.
Location	At the partner company/campus (e.g., Vignan Institute of Technology, Telangana).
Fees	Custom quote — no fixed public price; scoped per engagement.
What's Included	Certification for every attending faculty member / employee; full photo & video documentation.
Application Process	Submit the "Request a Quote" form or the "Partner With Us" form specifying Faculty Development Program (Co-Host) as the partnership interest.
Registration / Contact Link	https://www.hiddengemsco.in/request_quote.html or https://www.hiddengemsco.in/partner_with_us.html
Application Deadline	Rolling / by request — no fixed deadline.
Current Status	Active — next FDP cohorts described as "in planning" (see Section 16).

What it covers:

- Tailored curriculum per company
- Tech + soft-skill workshop tracks
- Hands-on, not lecture-only
- Certification for every employee

Call to action: Request for Your Team → — https://www.hiddengemsco.in/join_program.html (general form) / https://www.hiddengemsco.in/request_quote.html (quote request)

■ Program 5 — Child Development Program

Description	Soft-skills and passion-first foundations for younger students — helping kids discover what they're curious about before ever talking about "careers."
Purpose	Build confidence and soft skills in younger children and give them a safe first exposure to community learning.
Target Audience	Younger / school-age students (specific age band not published).
Eligibility	Not published on the website at the time of this extraction.
Required Skills	None — passion/interest discovery format.
Level	Beginner / age-appropriate.
Duration / Schedule	Not published on the website at the time of this extraction.
Mode	Not published on the website at the time of this extraction.
Location	Telangana, India (community/partner venues).
Fees	Not published on the website at the time of this extraction.
Certificate	Verified, MSME-registered certificate (site-wide policy) where applicable.
Application Process	Register via the "Join This Program" form, selecting "Child Development Program."
Registration Link	https://www.hiddengemsco.in/join_program.html
Application Deadline	Not published on the website at the time of this extraction.
Current Status	Active / ongoing.

What it covers:

- Soft skills & confidence building
- Passion & interest discovery activities
- Age-appropriate, hands-on STEM play
- A safe first exposure to community learning

Call to action: Join This Program → — https://www.hiddengemsco.in/join_program.html

Program-Selector Tool ("60-Second Match")

The homepage includes an interactive 3-question quiz to recommend a program:

- Q1 — "Where are you right now?": Student / Job hunting / Faculty-institution / Business owner.
- Q2 — "What excites you most?": Learning new skills / Getting hired / Competing under pressure / Teaching others.
- Q3 — "How much time can you give it?": A few hours a week / A focused few weeks / One intense weekend / A multi-day on-campus block.

Sample output shown on the page: for a student who wants to learn new skills with a few hours a week, the match returned is the **Student Development Program**.

4. ■ Internships & Career Opportunities

Internship 1 — Cohort (Online Internship)

Program Name	Cohort / Cohort-1 (Online Internship)
Role / Description	Structured 30-student online internship focused on real-world business analysis and entrepreneurship development — participants analyze real local businesses, weigh trade-offs behind actual business decisions, and interact directly with practicing entrepreneurs.
Required Skills	Not published on the website at the time of this extraction. (open to students interested in business/entrepreneurship analysis; no technical prerequisite stated).
Eligibility	Students (city-agnostic — cohorts run online so students from any city can join).
Cohort Size	30 students (as run for Cohort-1).
Duration	Not published on the website at the time of this extraction. ("cohort" length in weeks not published).
Location / Work Mode	Fully online.
Stipend	None published — this is a paid-entry program (■999 fee) rather than a paid/stipend internship; it is structured as a training internship, not employment.
Fee	■999 per cohort.
What's Included	1:1 mentor pairing for the full cohort; real business case work with local entrepreneurs; guaranteed entry into the closing hackathon; completion certificate + Letter of Recommendation (LOR) eligibility.
Application Process	Apply via the Cohort Internship Application form (apply_cohort.html): Full Name, Email Address, College/Institution, and "Why do you want to join this cohort?"
Registration Link	https://www.hiddengemsco.in/apply_cohort.html
Application Deadline	Not published on the website at the time of this extraction.
Current Status	Cohort-2 is explicitly described as "in planning" with dates "published the moment they're locked" — see Section 16 (Waitlist open).

Career / Core-Team Opportunities ("Join the Core Team")

Separate from paid cohort internships, Hidden Gems also recruits unpaid/volunteer-style internship and operational roles to help run the community itself, via the "Join the Core Team" application (internship.html).

Available roles (select all that fit):

- Social Media Manager
- Video Editor / Animator
- Graphic Designer
- Content Writer / Copywriter
- Web Developer
- Event Coordinator
- Community Manager
- UI/UX Designer

Availability options: Part-time (10–15 hrs/week), Full-time Intern (40 hrs/week), Weekends Only, Project-based / Freelance.

Duration options: 1–3 months, 3–6 months, Long-term.

Eligibility / Experience	Open to students and working professionals; application captures College/University/Company, Degree/Major, and Year of Study/Graduation (1st–4th Year, Recently Graduated, or Working Professional).
Stipend	Not published on the website at the time of this extraction. (positioned as "real-world projects, direct mentorship, verified certificates" rather than a paid stipend).
Application Requirements	Full Name, Email, Phone/WhatsApp, College/University/Company, Degree/Major, Year of Study, City & State, Role selection, Availability, Duration, LinkedIn URL (optional), Portfolio/GitHub/Drive link (optional), and a short "why you want to join" answer.
Application Process	4-step form (Details → Role → Portfolio → Review), submitted via WhatsApp or Email with pre-filled details.
Registration Link	https://www.hiddengemsco.in/internship.html
Current Status	Open / rolling applications.

Career Opportunities / Hiring Partners

The Job Readiness Program offers "direct exposure to hiring partners," and the community membership tier includes "early access to hackathon registrations" and opportunity alerts via a monthly newsletter. The homepage displays a "Business Partners" counter and a partner-logo section (including Vignan Institute of Technology), but does not name individual hiring-partner companies in the page text.

Not published on the website at the time of this extraction. (No named list of hiring partner companies was published in the text content.)

5. ■ Events

Upcoming Event — TTT Session on Presentation Skills

Event Name	Train-the-Trainer (TTT) Session: "Presentation Skills that command a room"
Description	A live, focused hour built for people who train, teach, or present — in any room, virtual or physical — covering confident presence, online delivery, offline delivery, and audience engagement.
Event Type	Train-the-Trainer (TTT) live session
Date	30 August 2026
Time	10:00–11:00 AM
Platform / Location	Google Meet (online)
Mode	Online
Eligibility	Open to all; the registration form asks for experience level: Fresher (willing to start career), 1–2 years experience, or Other.
Prerequisites	None stated.
Topics Covered	1) Confident presence — building a professional trainer presence from the first minute. 2) Online delivery — pacing and engagement for virtual sessions. 3) Offline delivery — presenting effectively in classroom/offline sessions and reading a live room. 4) Audience engagement — practical ways to keep an audience engaged from open to close.
Benefits	Certificate included; limited seats framed as a high-value, focused session.
Registration Process	Submit the registration form: Full name, Email address, Phone/WhatsApp number, Eligibility/experience level, and an optional note on what you hope to learn.
Registration Link	https://www.hiddengemsco.in/ttt-registration.html
Registration Deadline	29 August 2026
Event Status	Upcoming (as promoted via the homepage announcement banner).

Quote from the event page: "Your content may be good. But your presentation decides the impact." — Hidden Gems Community

Documented Past Events ("Moments from the dig site")

The homepage's media gallery documents six past community events/programs:

- **Osmania Ground Ideation** — Where it all started; the core team mapping out real-world entrepreneurship challenges.
- **Ujwala Park Expansion** (Karimnagar) — Uniting new minds from Karimnagar and Hyderabad to build a unified business mindset.
- **Cohort-1 (Online Internship)** — A structured 30-student online internship focused on real-world business analysis and entrepreneurship development.
- **Ignite-X Hackathon** — 48 hours of intense coding, problem-solving, and pitching directly to business leaders.
- **Vignan Institute FDP** — In-person program equipping faculty with modern AI and IoT instructional strategies.
- **Child Development Program** — Passion-first foundations, confidence building, and hands-on STEM play for younger learners.

Each of these is presented as an auto-slideshow of event photography on the homepage (image galleries: osmania_meet, ujwala_meet, ignite_x_hack, cohert/cohort, FDP, and child_dev image sets).

6. ■ Hackathons & Competitions

Hackathon / Ideathon (Program Type 03 — general format)

Description	Time-boxed, high-pressure building — SDP and Job Readiness skills tested against a real problem statement and a room of judges.
Themes / Problem Statements	Real problem statements sourced from partner businesses (specific themes rotate per edition; not published in advance on the general page).
Eligibility	Open registration via the program form; team-based participation implied by "Register your team to build, pitch, and compete."
Team Size	Not published on the website at the time of this extraction.
Individual/Team	Team-based (per program description).
Technologies Allowed	Not published on the website at the time of this extraction.
Registration Process	Via the "Join This Program" form, selecting "Hackathon / Ideathon."
Important Dates	Not published for a specific upcoming edition — see Section 16 for the next known edition status.
Submission Requirements	Not published on the website at the time of this extraction.
Judging Criteria	Not published on the website at the time of this extraction.
Prizes	Real prize money and certificates for winners.
Certificates	Certificates awarded to winners; general certificate policy (MSME-registered, verifiable) applies.
Mentorship	Direct pitch time with business leaders; 1:1 mentor ratio applies site-wide.
Rules	Not published on the website at the time of this extraction.
Registration Link	https://www.hiddengemsco.in/join_program.html

Flagship Example — Ignite-X Hackathon

Ignite-X is the flagship, documented hackathon that closed out Cohort-1. It is described as 48 hours of intense coding, problem-solving, and pitching directly to business leaders, and awarded real prize money and certificates to its winners. A future edition ("the next Ignite-X") is described on the homepage as being "in planning," with real dates to be published once locked (see Section 16).

7. ■■■ Mentorship

Mentorship at Hidden Gems is not offered as a separate, stand-alone bookable program — it is woven into every program as a core differentiator ("1:1 Mentor Ratio") and is one of the named partnership types businesses can sign up for.

Mentorship Program / Format

Program	Mentorship is embedded across SDP, Job Readiness, Cohort/Internship, Hackathons, and FDP — not a separate product with its own signup page.
Available Mentors	Not published on the website at the time of this extraction. (individual mentor names/bios are not published).
Mentor Expertise	Real, practicing entrepreneurs and business leaders (explicitly distinguished from theory-only instructors).
Areas of Mentorship	Business analysis and entrepreneurship strategy (Cohort program), soft skills and tech fundamentals (SDP), resume/interview readiness (Job Readiness Program), and pitching/problem-solving (Hackathons).
Who Can Apply	Any student enrolled in a Hidden Gems program; businesses can also apply to become mentors via the Partner With Us form (Partnership Type: "Mentorship Program").
Mentorship Format	1:1 mentor pairing ("No cohort-average pacing — every student gets a dedicated mentor who adjusts to where they actually are").
Session Duration / Frequency	Not published on the website at the time of this extraction.
How to Request a Mentor (as a student)	Enroll in a Hidden Gems program — mentorship is bundled in, not booked separately.
How to Become a Mentor (as a business/professional)	Submit the "Partner With Us" form and select "Mentorship Program" under Type of Partnership.
Eligibility (mentors)	Businesses/institutions/professionals — captured via the Partner With Us organization-details form.
Fees	Bundled into program fees for students; no cost to register interest as a mentor ("No Cost to Register Interest" stated on the partner form).
Booking Process	Partner form → Organization Details → Primary Contact → Partnership Interests (incl. Mentorship Program, preferred programs to support, budget/duration) → Review & Submit via WhatsApp or Email.
Link	https://www.hiddengemsco.in/partner_with_us.html

8. ■ Learning Resources

Hidden Gems does not publish a standalone resource library, blog, or downloadable course/tutorial catalog on the site. Learning content is delivered inside its live programs rather than as open self-serve resources. The closest published equivalents are the skill areas taught within each program:

Courses / Learning Paths (delivered through programs)

- **SDP track:** Soft skills & communication, core tech skills across popular stacks, STEM & STEAM hands-on projects, and an introduction to advanced tech (AI, IoT, robotics).
- **Job Readiness track:** Resume & LinkedIn building, mock interviews, aptitude & communication prep.
- **FDP / Corporate Training track:** AI technologies, soft skills, and AI-integrated electronics (as run at Vignan Institute of Technology).
- **TTT (Train-the-Trainer) sessions:** Presentation skills, online delivery, offline delivery, audience engagement (see Section 5).

Workshops

Corporate Trainings are described as "tech + soft-skill workshop tracks" that are "hands-on, not lecture-only." One-off skill workshops (like the TTT Presentation Skills session) are also run periodically as standalone live events.

Tutorials / Projects / Study Resources

Not published on the website at the time of this extraction. — no downloadable tutorials, project templates, or a public study-resource repository were found linked on the site.

Recommended Technologies

Based on stated program content: AI, IoT, robotics, and "AI-integrated electronics" (from the FDP curriculum), plus general "core tech skills across popular stacks" (from SDP) — specific languages/frameworks are not itemised.

Beginner / Intermediate / Advanced Resources

The site distinguishes level primarily by program: SDP and the Child Development Program are explicitly beginner-oriented ("built for beginners"); the Job Readiness Program assumes some foundational skill and focuses on hiring readiness; Hackathons and FDPs assume participants apply existing skills under pressure or teach them onward. No formal "Beginner / Intermediate / Advanced" resource tiers are labelled as such.

Career Preparation Resources

Covered by the Job Readiness Program: resume & LinkedIn profile building, mock interviews with real professionals, aptitude & communication prep, and direct exposure to hiring partners.

9. ■ Projects & Opportunities

Hidden Gems does not publish a catalog of individual, itemised "open projects" (like a GitHub issue board). Project-style work happens inside the Cohort/Internship and Core Team tracks:

Cohort Business-Analysis Projects

Description	Within the Cohort (Online Internship), students analyze real local businesses and work through the trade-offs behind an actual business decision, culminating in direct conversations with practicing entrepreneurs.
Category	Entrepreneurship / business analysis.
Required Skills	None mandatory — designed as a learning-by-doing format.
Eligibility	Any enrolled Cohort participant (see Section 4).
Difficulty	Not published on the website at the time of this extraction.
Team Requirements	Not published on the website at the time of this extraction. (cohort size is 30 students; individual vs. team project structure not detailed).
Duration	Length of the cohort (exact weeks not published).
Expected Outcome	Completion certificate + LOR eligibility, and guaranteed entry into the closing hackathon.
How to Participate	Apply via apply_cohort.html (■999 fee).

Core Team Project Opportunities

Volunteers/interns joining the Core Team (see Section 4) work on real operational projects for the community itself — social media, content, design, web development, event coordination, and community management — described on the internship page as "Real-World Projects, Direct Mentorship, Verified Certificates."

How to Participate	Apply via internship.html (Join the Core Team form).
Application Process	4-step form: Details → Role → Portfolio → Review, submitted via WhatsApp or Email.

10. ■ Certificates & Achievements

Certificate Policy (site-wide)

Hidden Gems states its certificates are: "MSME-registered, documented, and addressed to you by name — not a generic participation PDF." The FAQ reiterates: "Yes. Every certificate is MSME-registered, addressed to the recipient by name, and backed by documented photos and video from the program — not a generic PDF."

Certificate Types (by program/event)

- **Cohort (Online Internship) completion certificate** — plus LOR (Letter of Recommendation) eligibility.
- **Hackathon winner certificates** — awarded alongside prize money (e.g., Ignite-X).
- **FDP / Corporate Training certification** — issued to every attending faculty member or employee.
- **TTT session certificate** — included for registered participants of the Presentation Skills session.
- **General program certificates** — issued across SDP, Job Readiness, and Child Development Program completions.

Eligibility for Certificates / Completion Requirements

Not published on the website at the time of this extraction. — exact attendance/completion thresholds (e.g., minimum sessions attended) are not published; certificates appear tied to program completion generally.

Certificate Issuing Process

Documented as MSME-registered and "addressed to you by name," with supporting photo and video documentation retained per program. Digital vs. physical format is not explicitly specified.

Recognition / Badges / Awards

Cash prize money and certificates for hackathon winners (documented for Ignite-X). No separate digital badge system is mentioned.

11. ■ Registration & Application Process

Hidden Gems uses several distinct forms depending on what you're applying for. There is no single unified "create an account" login system described — each pathway below is a standalone form.

A. Community Membership (free)

- Fields: Full Name, Email Address, Mobile Number.
- Process: Submit → request routes directly to the admin dashboard.
- Link: https://www.hiddengemsco.in/join_community.html

B. Program Registration (SDP / Job Readiness / Hackathon / FDP-Corporate Training / Child Development)

- Step 1 — Contact: Full Name, Email, Phone/WhatsApp, City & State.
- Step 2 — Program: Select one of the five programs.
- Step 3 — Background: College/University/Company, Current Status (High School Student, College Student, Recent Graduate, Faculty/Educator, Working Professional, Other), Major/Designation, and program goals.
- Step 4 — Review & Submit: Confirm accuracy and consent, then send via WhatsApp or Email (pre-filled either way).
- Link: https://www.hiddengemsco.in/join_program.html

C. Cohort (Online Internship) Application — Paid, ■999

- Fields: Full Name, Email Address, College/Institution, "Why do you want to join this cohort?"
- Link: https://www.hiddengemsco.in/apply_cohort.html

D. Core Team / Internship Application (volunteer/operational roles)

- Step 1 — Details: Full Name, Email, Phone/WhatsApp, College/University/Company, Degree/Major, Year of Study/Graduation, City & State.
- Step 2 — Role: Select one or more roles (Social Media Manager, Video Editor/Animator, Graphic Designer, Content Writer/Copywriter, Web Developer, Event Coordinator, Community Manager, UI/UX Designer), plus Availability and Duration.
- Step 3 — Portfolio: LinkedIn URL, Portfolio/GitHub/Drive link, and a short "why join" answer.
- Step 4 — Review & Submit: Confirm accuracy and consent, then send via WhatsApp or Email.
- Link: <https://www.hiddengemsco.in/internship.html>

E. Event Registration (example: TTT Presentation Skills session)

- Fields: Full name, Email address, Phone/WhatsApp number, Eligibility/experience level (Fresher, 1–2 years, Other), and an optional learning-goal note.
- Link: <https://www.hiddengemsco.in/ttt-registration.html>

F. Business / Institution Partnership Application

- Step 1 — Company: Organization Name, Type, Industry/Sector, Year Established, Company Size, Website, CIN/Registration Number, GSTIN (optional), Registered Address, City, State, Pincode, Country.
- Step 2 — Contact: Primary Contact Name, Designation, Official Email, Phone/WhatsApp, Alternate Contact (optional), LinkedIn (optional).

- Step 3 — Interests: Partnership Type(s) (Mentorship, Hiring/Talent Pipeline, Hackathon Sponsorship, FDP Co-Host, CSR/Funding Support, Internship Placements, Guest Lectures/Workshops, Venue/Infrastructure Support), Preferred Programs to Support, Estimated Engagement Budget, Expected Engagement Duration, How you heard about Hidden Gems.
- Step 4 — Review & Submit: Confirm accuracy and consent, optionally attach a brochure via email, then send via WhatsApp or Email.
- Link: https://www.hiddengemsco.in/partner_with_us.html

G. Volunteer Registration

- Fields: Full Name, Volunteer Area (Social Media, Video & Photography, Entrepreneurship, Problem Solving, Art & Design, Tech & Non-Tech, AI & Technology), Skills/Experience, Why you want to join, How you can contribute, WhatsApp/Contact Number.
- Link: <https://www.hiddengemsco.in/volunteer.html>

H. Request a Quote (Custom Web/App Dev, AI/ML Solutions, IoT & Hardware Prototyping)

- Fields: Your Name/Company Name, Business Email, Service Required (dropdown), Project Details.
- Link: https://www.hiddengemsco.in/request_quote.html
- Note: this form is presented under the site's technical-services arm and uses "AdhyaA Labs" branding in its page title — it is linked directly from the FDP "Request a Quote" call-to-action.

I. Waitlist (for Cohort-2 / next Ignite-X / future FDP cohorts)

- Fields: Full Name, Email Address.
- Link: https://www.hiddengemsco.in/join_waitlist.html

General Notes on the Process

- **Required documents:** Not published on the website at the time of this extraction. — no document uploads (transcripts, ID proof, etc.) are requested in any of the forms found; only text fields and optional links.
- **Selection process:** Not published on the website at the time of this extraction. — not described publicly (no stated shortlisting/interview criteria beyond the qualitative "why you want to join" answers).
- **Acceptance / rejection communication:** Not published on the website at the time of this extraction. — forms state requests route to WhatsApp/Email/admin dashboard; no automated confirmation or status-tracking system is described.
- **Application status tracking:** Not published on the website at the time of this extraction. — no applicant portal or status page found.
- **Cancellation / withdrawal:** Not published on the website at the time of this extraction. — no explicit policy published; likely handled directly via the contact email/WhatsApp.

12. ■ Fees & Payments

Tier	Price	What's Included
Community Membership	Free	Invites to meetups & founder talks; monthly newsletter & opportunity alerts; early access to hackathon registrations.
Cohort (Online Internship) — "Most Popular Structured Program"	■999 / cohort	1:1 mentor pairing for the full cohort; real business case work with local entrepreneurs; guaranteed entry into the closing hackathon; completion certificate + LOR eligibility.
Faculty Development Program (FDP) — "For Institutions"	Custom quote	3-day on-campus, tailored curriculum; AI, soft skills & AI-integrated electronics tracks; certification for every attending faculty member; full photo & video documentation included.

How Fees Are Used (Transparency Breakdown)

Hidden Gems publishes a "100% Reinvested" breakdown of where program contributions go (figures are indicative and reviewed every cohort):

- **Mentorship & Program Delivery — 35%** (mentor hours, session planning, curriculum design)
- **Hackathon Prizes & Rewards — 25%** (cash prizes, certificates, winner goodies)
- **Venue, Travel & Operations — 22%** (event spaces, logistics, on-ground staffing)
- **Materials, Tools & Platform — 18%** (learning resources, software, documentation)

Note: the percentages above are reproduced exactly as published on the site. Hidden Gems states "every rupee collected goes back into running the community, never into private profit."

Scholarships / Discounts

Not published on the website at the time of this extraction. — no scholarship or discount program is described on the site.

Payment Methods

Not published on the website at the time of this extraction. — the site's forms collect applications but do not display an on-page payment gateway or list accepted payment methods (UPI/card/etc.) in the extracted text.

Refund Policy

Not published on the website at the time of this extraction. — no refund policy text was found on the pages crawled.

Payment Deadlines

Not published on the website at the time of this extraction. — tied implicitly to each program's registration deadline where one is published (e.g., the TTT event's 29 Aug 2026 registration close).

Request a Quote — Paid Technical Services (adjacent to program fees)

Separately from community programs, the site also links to a "Request a Quote" form for custom technical services — Custom Web/App Development, AI/Machine Learning Solutions, and IoT & Hardware Prototyping — priced individually per project scope (no fixed rate card published).

13. ■ Frequently Asked Questions

The following are the exact questions and official answers published on the Hidden Gems homepage FAQ section ("Good To Know — Frequently asked questions"), followed by a set of additional practical questions answered using verified details compiled elsewhere on the site.

Published on the Website

Q: Do I need any prior experience to join SDP?

A: No. The Student Development Program is built for beginners — soft skills, tech fundamentals, and STEM/STEAM basics are taught from the ground up before anything advanced comes in.

Q: Is the Cohort Internship online or in-person?

A: Cohorts run online so students from any city can join, while flagship programs like the FDP and major hackathons are hosted in person at partner campuses and community grounds.

Q: Are the certificates actually verifiable?

A: Yes. Every certificate is MSME-registered, addressed to the recipient by name, and backed by documented photos and video from the program — not a generic PDF.

Q: How do businesses or institutions get involved?

A: Through mentorship, hiring from our talent pipeline, sponsoring hackathon prizes, or co-hosting a Faculty Development Program — reach out through the Partner With Us form and we'll scope it together.

Q: Where does the program fee actually go?

A: Every rupee is reinvested — mentorship & delivery, hackathon prizes, venue & operations, and learning materials. See the full breakdown in the Pricing section (Section 12 of this document).

Additional Practical Questions (compiled from across the site)

Q: What is Hidden Gems?

A: Hidden Gems (Hidden Gems Society) is an MSME-registered Student & Faculty Growth Community based in Telangana, India, running hackathons, mentorship, and faculty programs that turn student and educator potential into industry-ready output.

Q: Who can join?

A: Students (school through college), job seekers, faculty/educators, and businesses/institutions can all engage — through free community membership, paid structured programs, or institutional partnerships.

Q: How do I register?

A: Choose the right form for what you want: Join Community (free membership), Join This Program (SDP/Job Readiness/Hackathon/FDP/Child Development), Apply for the Cohort Internship, or Join the Core Team — see Section 11 for direct links.

Q: What programs are available?

A: Five: Student Development Program (SDP), Job Readiness Program, Hackathon/Ideathon, Corporate Trainings (incl. Faculty Development Program), and Child Development Program.

Q: Which program is right for me?

A: Use the homepage's "60-Second Match" tool — answer three quick questions (who you are, what excites you, how much time you have) and it recommends a program.

Q: Are programs free?

A: Community membership is free. The Cohort (Online Internship) costs ■999. Faculty Development Programs and Corporate Trainings are custom-quoted. Fees for SDP, Job Readiness, Hackathons, and the Child Development Program individually are not published on the site.

Q: Do I need previous experience?

A: No — SDP and the Child Development Program are explicitly built for beginners. Other programs (Job Readiness, Hackathons) do not state a hard prerequisite either.

Q: Can beginners participate?

A: Yes — beginners are the primary audience for the Student Development Program and Child Development Program in particular.

Q: How do I apply for internships?

A: For the paid Cohort/Online Internship, use [apply_cohort.html](#). For unpaid/volunteer core-team internship roles (social media, design, dev, etc.), use [internship.html](#).

Q: How do I join an event?

A: Register through the specific event's registration form — e.g., the TTT Presentation Skills session at [ttt-registration.html](#) — before its stated registration deadline.

Q: How do I get a certificate?

A: Certificates are issued on completion of Hidden Gems programs/events; they are MSME-registered, addressed to the recipient by name, and backed by documented photos/video.

Q: How can I contact Hidden Gems?

A: Email hiddengemsocietyngo@gmail.com, WhatsApp/Call +91 94946 08408, or use any of the site's specific-purpose contact forms (see Sections 14 and 15).

14. ■ Support & Contact

General Contact / Email	hiddengemssocietyngo@gmail.com
WhatsApp / Call	+91 94946 08408 — https://wa.me/919494608408
Office / Location	Telangana, India (region-wide presence; no single street address published).
Support Process	Direct contact via email or WhatsApp for founders, partners, or students who "prefer to talk directly... without filling out an application."
Technical Support	Not published on the website at the time of this extraction. (no dedicated tech-support channel distinct from general email/WhatsApp is published).
Program-Related Support	Handled through the same email/WhatsApp channels, or the relevant program's registration form.
Partnership Inquiries	Via the Partner With Us form (https://www.hiddengemsco.in/partner_with_us.html) or directly by email/WhatsApp.
Social Media	Not published on the website at the time of this extraction. — no specific social handles/links were found in the crawled page content (only a generic "Share this page" action exists in the footer).
Response Expectations	Not published on the website at the time of this extraction. — no stated SLA/response-time commitment was found published on the site.
On-site Chat Assistant	The site features an in-page chat assistant named "Gemmy" (■) — introduced with: "Hi there! I'm Gemmy. Ask me about our programs, pricing, or team!"

15. ■ Important Links

Purpose	URL

WhatsApp / Call	https://wa.me/919494608408

Pages Referenced from the Homepage that Returned 404 (Not Live) at Extraction Time

- [view_programmes.html](#) (linked as "Programmes →" under the Hub section) — not found (404).
- [partners.html](#) (linked as "Partners" in the top nav and Hub section) — not found (404).

These two links are visibly present in the site's navigation/Hub but did not resolve to a live page during this extraction; their content could not be included.

Forms Sharing Third-Party Branding

Two form pages linked from Hidden Gems' own site (Request a Quote and Join Waitlist) carry a page title referencing "AdhyaA Labs" rather than "Hidden Gems," suggesting these specific forms may be powered by a shared/partner form-building platform or technical-services arm. This is noted here for transparency; the form content itself is reproduced as published.

16. ■ Current & Time-Sensitive Information

Compiled/extracted: September 2026. Everything in this section is subject to change and should be re-verified on the live site before acting on it.

Currently Active Programs

- Student Development Program (SDP) — active, rolling enrollment.
- Job Readiness Program — active, rolling enrollment.
- Hackathon / Ideathon — registration open on the general program form; no specific edition currently dated (next Ignite-X is "in planning").
- Corporate Trainings / Faculty Development Program — active, by custom quote; next FDP cohorts "in planning."
- Child Development Program — active, rolling enrollment.

Upcoming Event

TTT Session on Presentation Skills — 30 August 2026, 10–11 AM, via Google Meet. Registration closes 29 August 2026. Promoted via a homepage banner: "■ Upcoming Event: TTT Session on Presentation Skills (Aug 30, 2026)" with a direct "Register Now" link.

Note: this date falls before the document compilation date, so by the time this PDF is read this specific session's registration window may already have closed — please check the live homepage banner for the current upcoming event.

"What's Next" — Officially Announced Upcoming Items

The homepage's "The next chapter is being written" section states plainly: "Cohort-2, the next Ignite-X, and future FDP cohorts are in planning. We publish real dates the moment they're locked — no placeholders, no guesswork."

- **Cohort-2 (Internship)** — in planning; a live countdown timer is shown on the homepage but was not populated with real values ("-- Days -- Hours -- Mins -- Secs") at extraction time, meaning no confirmed kickoff date has been set yet.
- **Next Ignite-X (hackathon)** — in planning; no confirmed date.
- **Future FDP cohorts** — in planning; no confirmed date.

Interested users can join the waitlist to be notified: https://www.hiddengemsco.in/join_waitlist.html

Open Internships

- Cohort (Online Internship) — apply now, ■999, rolling admission until the current cohort fills / closes (exact cutoff not published).
- Core Team internship/volunteer roles (8 role types) — open, rolling admission.

Open Applications

- All five programs (SDP, Job Readiness, Hackathon/Ideathon, Corporate Training/FDP, Child Development) — open via [join_program.html](#).
- Community membership — open, free, via [join_community.html](#).
- Volunteer registration — open via [volunteer.html](#).
- Partnership applications (for businesses/institutions) — open via [partner_with_us.html](#).

Application / Registration Deadlines

- TTT Presentation Skills session — registration closed 29 Aug 2026 (event held 30 Aug 2026).
- All other programs/forms — rolling, no published fixed deadline.

Current Fees

- Community Membership — Free.
- Cohort (Online Internship) — ■999 per cohort.
- Faculty Development Program — Custom quote.
- SDP, Job Readiness, Hackathon/Ideathon, Child Development Program — fee not individually published.

Current Announcements

The only live banner announcement captured at extraction time was the TTT Presentation Skills session promotion described above.

Recently Added / Closed Opportunities

Not published on the website at the time of this extraction. — the site does not publish a changelog or "recently added" / "recently closed" opportunities list; status must be inferred from the "in planning" language and the single dated event found.

17. ■ Notes on Data Coverage & Limitations

This document was compiled by extracting and structuring all text content visible on the following live pages of www.hiddengemsco.in as of the compilation date:

- / (homepage — index.html)
- /internship.html (Join the Core Team)
- /join_community.html
- /join_program.html
- /apply_cohort.html
- /request_quote.html
- /partner_with_us.html
- /volunteer.html
- /tnt-registration.html
- /join_waitlist.html

Two pages linked from the homepage navigation — **/view_programmes.html** and **/partners.html** — returned a 404 (not found) error at extraction time and could not be included.

Wherever the website did not publish a specific detail (e.g., exact program duration, named mentors, a refund policy, social-media handles), this document explicitly marks the field as *"Not published on the website at the time of this extraction"* rather than inventing or guessing a value. This is intentional: Gemmy (or any downstream reader of this knowledge base) should treat any such field as unknown and, if asked, should direct the user to contact Hidden Gems directly at hiddengemssocietyngo@gmail.com or +91 94946 08408 for confirmation.

Because several key figures on the homepage (Students Mentored, Business Partners, Events & Hackathons, Flagship FDP counters) are rendered as animated counters starting from "0" in the page's underlying markup, their live numeric values could not be captured from static text extraction and are not included as figures in this document.

All prices, dates, and quoted statements above are reproduced exactly as published on the site as of the compilation date; please re-check the live site for any time-sensitive detail before relying on it.
